Dear Dave,

I write on behalf of The Downtown School to thank you for the way you and your company transformed our new school playground. The grass is absolutely beautiful! It looks so real and has brought a true “park” feel to our space. When I look at our end-result, I cannot imagine that we ever considered a rubber-tiled surface in our initial plans. Your turf is in a different league than other playground surfaces and we feel fortunate to have it at our school.

Beyond the looks, however, the product has been wonderful for cushioning falls, preventing scrapes and making a comfy spot for kids to sit down and relax during their outdoor time. The feedback from students, teachers and staff has been nothing but positive.

I also want to extend my thanks for the quality workmanship in installing the turf. I know we had more than a few equipment posts to work around. Even so, the seams are imperceptible. Finally, I appreciate your professionalism and your follow up after installation to be certain everything was to our liking.

I wish you could have been present at the grand opening to share the excitement and joy of the students. Thank you again – it was a pleasure to work with you and your team.

Sincerely,

Mari Valaoras
Playground Chairperson
