

A full-page photograph of two young girls crawling on a vibrant green artificial grass surface in a playground. The girl in the foreground has long dark hair and is wearing a black shirt, while the girl behind her has long red hair and is wearing denim overalls. In the background, there are colorful playground structures, including a large blue and orange circular frame. The overall scene is bright and cheerful, emphasizing the playability of the artificial grass.

**“WHEN YOU HAVE  
PLAYGROUND GRASS,<sup>TM</sup>  
THE TURF ITSELF IS  
A PLAY ELEMENT.”**

# THE ULTIMATE PLAY ELEMENT

Inspire imaginative play from their first steps on the playground. With Playground Grass™, sensory elements become an inherent aspect of your space with colorful, textural features.

Play is no longer restricted to pre-existing equipment. With our innovative synthetic turf products, the ground itself transforms into an exciting element for kids to engage with. Children can roll, jump, slide, crawl, cartwheel, tumble, and twirl before they even make it to the monkey bars.

**“[Our favorite feature is] the kids’ excitement of running through the grass. They love to fall and jump and lay on it... you don’t see that with other surfaces.”**

Chris Leiner, Director of Parks & Properties, Greater Chicago area

The importance of free play in a child's development cannot be overstated, which is why we strive to provide engaging playground surface visuals and experiences that captivate imagination, enhance cognitive development, and create enthralling play experiences for children of all ages and abilities. Enhanced by unique additions like Funserts™, Funsclapes™, and Fuzzy Friends, Playground Grass is changing the way kids play.

Reimagine your next playground design with Playground Grass — it's what kids were meant to play on!

**“We’re seeing a trend of people looking at alternative surfaces—mainly synthetic turf products—because they are very accessible and add sensory elements.”**

Chris Leiner, Director of Parks & Properties, Greater Chicago area
